

# Organic Natural Sodium Bicarbonate

---

## **Organic Natural Sodium Bicarbonate:**

- soothes, relaxes, and also softens your skin

### **Description:**

Our premium grade, Sodium Bicarbonate is a natural, aluminium-free, USP & food grade baking soda, and is registered with Australia Certified Organic (ACO) as an Approved Ingredient for food formulations, or manufacturing organic products as a bicarb suitable for Organic Input Production.

Our bicarb contains no fillers, additives, anti-cake agents, colouring or fragrance. It's non-GMO, fumigation-free, allergen-free and is not tested on animals.

Also known as baking soda and bicarb of soda, it's a household staple – a safe, versatile, environmentally friendly product with a multitude of uses.

## **So how can you use bicarb?**

Here are just some of the ways:

Enjoy a refreshing and relaxing bicarb bath, Sodium Bicarbonate soothes, relaxes, and also softens your skin. Great for relieving tension after the gym or a hard day at work. Dissolve 2 cups of bicarb in your warm bath and relax for 15 minutes.

### **For natural wellbeing**

Bicarb can be used as a deodorant, as relief from itchy skin and sunburn, for splinter removal, as a toothpaste and tooth whitener, and more.

### **In the laundry**

Sodium bicarb added to your wash boosts the strength of laundry detergents, making your clothes cleaner, brighter and fresher.

### **As a natural cleaner**

Baking soda is a mild abrasive, perfect for removing stains from your sink, bench tops, bathroom tiles, bath and shower.

### **As a deodoriser**

Sodium bicarb eliminates odours rather than covering them up. Use it for smelly shoes, stale-smelling carpets, and in your bin, fridge and pantry to keep them smelling fresh. A good tip is to run your dishwasher and washing machine through a cycle with bicarb instead of detergent, to give them a great clean and reduce odours.
